

The ILF Group is an international engineering and consulting firm that helps its clients to successfully execute technically demanding industrial and infrastructure projects. 50 Years of experience helped us to successfully execute 6,000+ projects in more than 150 countries.

Hydropower is one of our core competence area. ILF actively helps its clients by managing customized projects of any type and size. In the last 35 years, ILF has successfully planned and designed more than 130 hydropower projects with capacities up to 1,400 MW around the World.

As a one-stop shop, ILF provides integrated, interdisciplinary services for hydropower project from the initial study through the design and tender phase to commissioning and start-up. Emphasis is always placed on developing individual solutions that meet the most stringent quality standards and take complex framework conditions into account.

We optimize projects in terms of economic efficiency and the diligent preparation of Environmental and Social Impact Assessments in line with international standards.

In 2014, ILF has established a regional hub for South East Asia in Bangkok/Thailand. Being closer to our customers, **ILF ASIA** is competently offering full engineering services for challenging hydropower and renewable energy projects in the region.

In hydropower sector, ILF Asia is offering complete life cycle planning and consulting services for all ranges and types of hydro projects. In the renewable energy sector, ILF Asia is specialized on large grid-connected, and off grid photovoltaics, hybridization of existing mini-grids and industrial energy efficient project.

Our ILF experts will present in the following conference sessions:

Florian Nagel, PhD, MSc, MBA

Project Financial & Managing Risk:
 Development of Bankable Hydropower Projects in South-East Asia using Monte Carlo Simulation
 13 March 2018

Lochan Devkota, MSc, MEI, BEng

Sedimentation Management:
 Impact of the Koshi Barrage & Embankments on River Morphology and Dynamics
 15 March 2018

Meet ILF at Stand No. 095
